LinkedIn | GitHub | **CodeChef (2⋆: 1407)** |

Career Objective

Undergraduate **Computer Science and Engineering (CSE)** student (**CGPA 3.86/4.00**) with strong problem-solving acumen (**770+ problems solved**) and practical experience in full-stack architecture. Proficient in **Next.js**, **TypeScript**, **Node.js**, and modern authentication pipelines (**Better-Auth**, **JWT/JWKS**). Proven ability in engineering responsive client interfaces and high-throughput REST APIs. Seeking a Software Engineer / Trainee Software Engineer role to build production-grade, scalable systems.

Education

Northern University Bangladesh — Dhaka, Bangladesh
B.Sc. in Computer Science and Engineering (CGPA: 3.86 out of 4.00, Completed 143 Credits) — *Jan 2023 – Present*

Dhaka College — Dhaka, Bangladesh
Higher Secondary Certificate (HSC), Science — *2019 – 2021*

Key Skills

Programming Languages: C++, C, TypeScript, JavaScript, Python, Java
Frontend Development: React.js, Next.js (App Router), Tailwind CSS, HTML5, CSS3
Backend & Databases: Node.js, Express.js, MongoDB, PostgreSQL, RESTful APIs
Authentication & Security: Better-Auth, JWT, JWKS, Protected Route Pipelines
Tools & Concepts: Git, GitHub, Linux / WSL (Ubuntu), VS Code, OOP, Data Structures & Algorithms

Competitive Programming & Achievements

Problem Solving Milestone: Solved **770+ algorithmic problems** across various platforms including Codeforces, CodeChef, LeetCode, LightOJ, and VJudge.

CodeChef: 2-Star Coder (Max Rating: **1407**, Div 3, **140 solved**) — Demonstrated algorithmic efficiency and regular contest performance. [Profile]

Codeforces Profile: Solved **383 problems** (Max Rating: 899) with strong proficiency in standard C++ and fast I/O optimization. [Profile]

LeetCode Profile: Actively solving core Data Structures (Arrays, Trees, Graphs, DP). [Profile]

Battle of the Brains – NUBCC Contest 2025: Secured **6th Rank** out of 18 participants (Handle: *19mh19*). [Standings]

NUBCC Ultimate Programming Contest 2025: Secured **7th Rank** out of 37 participants; solved 8 problems (Handle: *19mh19*). [Standings]

Academic and Personal Projects

StudioSpace | **Next.js, Node.js, Express, TypeScript, Better-Auth, JWT/JWKS** Live Demo | Frontend | Backend
- Architected a full-stack studio space booking system featuring **real-time schedule management**, slot reservations, and search filters.
- Implemented secure user authentication and protected routing pipelines utilizing **Better-Auth** and **JWKS/JWT** token verification.
- Engineered performant **RESTful APIs** in **Node.js** and **Express.js** with modular controllers, input validation, and error handling.
- Developed dynamic, type-safe client interfaces utilizing **Next.js App Router** and **Tailwind CSS** for optimized UX.

Wanderlust | **Next.js, Node.js, Express, MongoDB, Better-Auth, JWT/JWKS** Live Demo | Frontend | Backend
- Built a scalable destination discovery and travel booking web application with **multi-criteria location** and amenity filtering.
- Secured user sessions and protected API routes by implementing **Better-Auth** combined with **JWT/JWKS** verification pipelines.
- Developed high-throughput server endpoints in **Express.js** backed by **MongoDB** for seamless **CRUD operations** and listings.
- Designed performant client and server components in **Next.js**, ensuring rapid rendering and fluid user interactions.

Bazar-Dor | **React.js, Next.js, Better-Auth, Tailwind CSS, Client-Side Filtering** Live Demo | GitHub
- Developed a daily grocery and commodity price tracking system to monitor and compare **real-time market valuations**.
- Integrated **Better-Auth** for user authentication, protected routes, and persistent personalized commodity watchlists.
- Optimized **client-side state**, multi-criteria category filtering, and instant search algorithms with zero UI latency.
- Engineered clean, accessible UI components with **Tailwind CSS**, focusing on mobile-first usability and clarity.
